Hello Builders! Tired of your tubs being damaged during construction? How do you know you are receiving an undamaged tub? Are your tubs being damaged during installation? Are there defects on new tubs you just purchased?

These are all builder issues that can easily be resolved. Staples Tub Services has a market proven solution.

Tub Protection and Warranty Plan

The Process:

Staples will come out after rough-in inspection to clean the tub and inspect for any damage or abuse. Once our findings are documented, we cover the entire fixture with an adhesive wrap. We then guarantee your tub against normal construction damage through the closing of the house.

This process has proven to eliminate installation damage and save precious time for the cleaning crew. They simply remove the adhesive wrap at the end of construction. Remnants of plaster, paint, dirt and stain causing products are eliminated.

Finally, we will come out and buff the tub to ensure a perfect fixture for the deserving new home buyer.

The Tub Protection and Warranty Plan has great marketing appeal. Take the steps to give your customer the best product possible.
